NuWhite Glutathione Review

- It's a concentrated whitening supplement. **Nuwhite** is a softgel capsule easy to swallow, readily dissolves in the gastric juice, enhances bioavailability of the active ingredients thus ensuring effective absorption of the skin enhancing ingredients.
- Combination of the 6 powerful extracts will avoid you taking lots of beauty supplements. **Nuwhite** provides skin whitening, anti-aging, skin renewal and moisturizing. Gives you beautiful skin in just one step.

After taking NuWhite Glutathione for a month, according to customers reviews, a clear improvement in the skin color, which becomes clearly lighter, brighter and softer.

Pros:

- **NuWhite Glutathione** contains L- Glutathione, Collagen, Placenta Extract, CoQ10, Pomegranate Ellagic Acid known as anti-aging supplements. So once you pop a pill, you're not only whitening your skin but also adding a boost in anti-aging department.
- No discomforts like vomiting, headache, nausea, breakouts, or whatsoever while taking this supplement
- Made the skin glowing.
- The packaging- it is color pink! It is tightly sealed and contains a leaflet that has information about the product.
- The scent- unscented.
- It's in a softgel capsule that made it faster in absorption.
- This supplement gave me a good night sleep.
- I'm already fair to begin with but it made my skin pinkish/rosy white in tone.
- It lessened cystic pimples popping around my chin which I

experience every month.

- It also maintained my skin color despite the hot humid weather. I'm always outside doing errands in the afternoon.
- I also noticed that my my wounds heal faster. I have thin skin and I easily get a scratch from sharp objects,
- Batch, manufacturing and expiry date printed on the package.

Cons:

- Not easily accessible, you have to purchase it online.
- Because of the softgel's size, some may find it hard to swallow.
- The price can be steep to budget conscious individuals.
